## Secure File Transfer Protocol (SFTP)

## What is SFTP and role of SFTP?

Secure file transfer Protocol introduced to upload candidate details by the establishments and access details for DBT pay-outs without changing and overwrite any information by any user.

It is an open source software easily available on internet and operating system friendly.

## **Steps for Using SFTP**

1. Download FileZilla in your system from internet.

2. Once successfully downloaded and installed, you will get the below screen as the home-page of the FileZilla.

File Zilla   File Edit View Iransfer Serv   III •   Host:	er Bookmarks Help	Sword:	Port:	Quickconnect						-	0	×

- 3. On the top of the page, there will few options which will be needed to login
  - Host
  - Username
  - Password
  - <u>Port</u>

Before the login, the status on FileZilla will be "Not Connected" Once the establishment fill the above details, the status will get change as connected.

- 4. We will share the login details with the establishments to access the SFTP.
- **5.** Once Connected, the establishment need to select the file from the directory which is on left -side of the page.
